

Are Mobile Devices the weakest link in your Enterprise Cybersecurity?

Today, every business from healthcare and retail to logistics and field services faces a range of threats that make it imperative to deploy the highest levels of mobile device security.

Redwall delivers unmatched mobile device security solutions backed by deep cybersecurity and software engineering expertise. Redwall solutions protect public sector agencies and private businesses against emerging threats to their mobile devices, applications, and connected infrastructure.

Redwall enhances Zebra's rugged mobile computers to support the highest level of performance, durability, and security for any business application.

The Ultimate in Mobile Device Security and Role-based Device Management

With Redwall, any organization can:

- Eliminate zero-day cybersecurity risks inherent in Windows, Android, and iOS devices
- Minimize the cost and disruption of frequent operating system patches
- Increase mobile device utility and return on investment

Beavercreek OH 45434

Redwall Mobile® security is uniquely designed to protect, separate, and control information on mobile devices from beneath the operating system.

Secure Persona® enables one device to serve as many, extending the value of mobile devices and solving the BYOD dilemma for Enterprise clients.

Mobile devices that rely on OS-level security protections are the weakest link in enterprise security, data integrity, and data protection. They require frequent patches and updates, and leave businesses vulnerable to zero-day attacks and other potentially devastating security threats.

A higher level of Control and Security

Redwall offers a uniquely different approach to mobile security, giving organizations the tools they need to reduce their mobile device operating costs, enhance device security, and gain greater functionality.

Redwall Mobile®

Unmatched device control and security

Redwall Mobile operates at a higher privilege than the operating system (OS). It controls the OS and enables protected devices to be fully configurable at the feature and function level. With Redwall Mobile, you can stop zero-day hacks and prevent privilege escalation by users, applications, or the operating system.

- Eliminate zero-day cybersecurity risks inherent in Windows, Android, and iOS devices
- Eliminating disruptive, costly, and complex OS patch/update cycles
- Use policy-driven activation/deactivation of device functionality to prevent malicious or unintentional compromise of data and devices
- Develop and deploy custom configurations in minutes
- Protect against unauthorized data access, user surveillance, and mobile device tracking

Secure Persona®

Unmatched role-based privacy

With Secure Persona, devices can be enabled for any number of personas, each with its own security settings, authentication requirements, and a unique policy that controls access to system features, drivers, files, and networks. Secure Persona eliminates the risk of cross contamination when devices are shared between users.

- Define personas with unique controls and device settings to maintain complete separation and isolation
- Employ all the control features of Redwall Mobile by persona
- Easily configure devices to serve highly compartmentalized roles such as multi-level security, HIPAA/HITECH, Law Enforcement on-duty/off-duty
- Allow multi-SIM operation by role or persona

Rugged, Reliable, and Secure

Get more done and protect your business with Zebra's next-generation mobile computers – protected by Redwall.

To succeed in today's digitally connected business world you need tools that help employees work faster, smarter, and more securely. From handholds and tablets to wearables and vehicle-mounted computers, Zebra's portfolio of mobile computing hardware enables your workers to perform at their best, shift after shift.

ET5X Tablet Computers

Zebra's rugged and lightweight ET5X enterprise tablet series is available with an 8-inch or 10-inch screen and can be customized for just about any job—inside the four walls or in the field.

L10 Rugged Tablet Platform

Whether you need a traditional tablet, a tablet with a rigid-handle and built-in barcode reader, or a 2-in-1 laptop/tablet with a full-featured keyboard, Zebra's L10 platform ensures you'll always have the right tool for the job.

TC72/TC77 Mobile Computers

Zebra's ultra-rugged TC72 WLAN and TC77 WWAN Mobile Computers deliver maximum computing power and unmatched performance in an ultra-rugged Android device designed to perform in the toughest conditions.
